

HEAL-CORP

Capability Statement

Health, Education And Liberty

Heal-Corp.org is a leading non-governmental organization (NGO) dedicated to providing immediate and effective medical response during natural and man-made disasters. Our mission is to save lives and alleviate suffering by delivering comprehensive, rapid, and sustainable medical services in crisis situations. With four years of field experience, we have responded to numerous disasters worldwide, including Haiti and Turkey, and have built a strong reputation for mobilizing skilled medical teams and critical supplies with speed and efficiency.

Core Capabilities

- **Disaster Medical Response:**

Rapid deployment of highly trained medical personnel, including doctors, nurses, paramedics, and specialized teams for trauma care, infectious disease management, and emergency surgery. Our teams are equipped to operate in austere environments with limited resources.

- **Field Hospitals & Clinics:**

Establishment of fully equipped, temporary field hospitals and mobile medical units in disaster zones. We provide emergency triage, surgical care, maternal and child health services, and long-term rehabilitation support for survivors.

- **Health Needs Assessment & Crisis Coordination:**

Conduct comprehensive assessments of public health needs in disaster-stricken areas, collaborating with local governments, UN agencies, and other NGOs. We ensure alignment with international standards, including Sphere Guidelines and the World Health Organization (WHO) health response protocols.

- **Medical Supply Distribution:**

Efficient procurement, transportation, and distribution of medical supplies, including essential medications, vaccines, surgical instruments, and personal protective equipment (PPE), often to areas with severe logistical challenges.

- **Training & Capacity Building:**

Providing emergency medical training and capacity-building workshops to local health personnel to strengthen disaster preparedness and resilience. This includes first responder training, trauma care, infectious disease prevention, and basic life-saving techniques.

- **Mental Health & Psychosocial Support (MHPSS):**

Offering psychological first aid, trauma counseling, and long-term mental health support for disaster survivors and healthcare workers, addressing the emotional and psychological impact of crisis events.

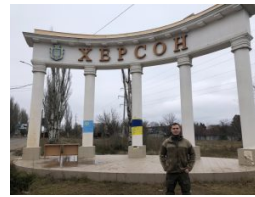

Experience & Expertise

Heal-Corp.org has been operational in multiple countries, including the United States, Haiti, Turkey, Sudan, and Ukraine. Our past response efforts include:

Hurricane Helene,
North Carolina

Delivered rapid emergency medical services to Western North Carolina following Hurricane Helene, treating patients and establishing a mobile clinic.

Ukraine

Deployed a medical team to Ukraine after providing emergency humanitarian aid, tons of essential supplies delivered to areas of highest need, and providing emergency response training.

Smokehouse
Creek Fire, Texas

Provided medical and delivery of essential supplies within hours of the declared emergency.

Turkey

Multidisciplinary team delivered rapid, effective, and compassionate aid, serving displaced individuals, offering health care, child nutrition support, and epidemic control measures.

Our team is composed of experienced medical professionals, logisticians, and disaster response experts who are equipped to navigate complex and challenging environments. Our NGO also operates under the highest ethical standards, with transparency and accountability in all our operations.

Key Partnerships

We collaborate with leading international organizations, governments, and local authorities to maximize the impact of our medical response. Our strategic partnerships include:

Ukraine

Key Strengths

> Rapid Deployment & Flexibility

We are capable of deploying fully functional medical teams and infrastructure within 24-48 hours of a disaster alert.

> Local Integration

We work closely with local health systems, authorities, and communities to ensure culturally sensitive and sustainable health interventions.

> Sustainability Focus

In addition to emergency response, we emphasize long-term recovery efforts, rebuilding health infrastructure, and enhancing local disaster preparedness.

> Proven Record of Success

Our leadership team has a track record of leading disaster response efforts for major global organizations, ensuring strategic and effective intervention.
